

Shooting - Progression of rifle and pistol European records

The founding congress of the ESC on August 18, 1969, also decided to set official European records. The same rules applied to the recognition as the UIT for the recognition of world records. Rule changes for the recognition of world records by the ISSF were also adopted for the European records by the ESC. The ESC accepted European records in all recognized men's, women's, and junior competitions only at the Olympic Games, World Championships and European Championships.

Deviating from the rules for recognizing world records, European records are also recognized:

Since 01.01.1996, the ESC accepted European records also at the 300 m Rifle European Cup Finals and individual European records are recognized if at least 15 male and 10 female shooters resp., team European records at least 5 male and 4 female teams resp. have taken part.

Since 01.01.2012 the limits for team records have changed again: 4 teams in the Olympic disciplines and 3 teams in the non-Olympic disciplines.

Since 01.01.2021 European records may be established in all recognized ESC events in the European Championships and European Games, as well as in Finals of European Cups according to the ISSF/ESC Rules and Regulations.
